Justice—GEO. W. F. ELKINS.

Surveyor—M. B. BURNS.

Coroner—J. H. COOPER.

County School Super.—JOHN M. ROSE.

Breadth Announcements.

We are authorized to announce B. M. COOPER as a candidate for the office of Surveyor of Booneville county, subject to the action of the Democratic party.

I have sold a half interest in THE HERALD, including good will, fixtures, etc., to Mr. J. M. Little. His name appears at the masthead as co-proprietor and publisher with this issue, and he will hereafter devote his time to the material interests of THE HERALD. Being a new man to the people around here he is too well known to the people around here to need an introduction in me, and to those who do not know him, I will say that he is a young man in every way worthy of your confidence and patronage. Mr. Little will solicit subscribers, advertisements, etc., and at times assist in getting out the paper, while the editorial management remains under the control of your most humble servant,

SPENCER COOPER.

With the present issue THE HERALD GREEN begins its second year.

During the year just ended we have tried to give our patrons as good a paper as it was in our power to make. That it has been the promoter of many public enterprises is patent to all. The publication of the paper was an enterprise of doubtful success, the editor was an out-caster stranger to this people, and the paper was handicapped with its first cost. Such is no longer the case. The paper is an established certainty, the editor has a measure become acquainted with the people and their wants, and last, though by no means least, it is practically out of debt. THE HERALD will in the future, as it has in the past, labor for the interests of the people of the mountains in every way that will tend to their advancement—morally, socially and financially. It will use every effort to bring our undeveloped wealth to the notice of capitalists, and to secure investment, and encourage the settling among us of industries, other citizens of whatever creed or condition in life. In all things it is for the people of the mountains, and it is for the people of the mountains in this part of the commonwealth to subscribe, and aid us to that extent in the good work we have mapped out. Let every one feel, with the poet,
